Press Release

Qualitix Clinical Research Co., Ltd. and ACTS Biosciences, Inc. entered a strategic partnership agreement

Taipei, Taiwan (November 10, 2009) –Taiwan's fast-growing CRO Qualitix Clinical Research Co., Ltd. and ACTS Biosciences, Inc. solely devoted to personalized medicine development announced that the two companies have entered a strategic partnership agreement to provide comprehensive clinical research services in the Asia-Pacific region. This alliance will allow the companies to offer integrated services of pharmacogenomics and traditional CRO under one umbrella to Pharmaceutical clients.

Dr. Stephen T. Chen, Chairman and Chief Executive Officer, ACTS Biosciences, Inc. stated "Our collaboration will offer cost-effective and efficient CRO services to the clients that can accelerate their drug development program". ACTS sister companies (Vita Genomics, Inc. and Shanghai GeneCore Biotechnologies, Co., Ltd.) located in Taiwan and China are equipped with the most advanced platform technologies, ISO accredited laboratories, and highly qualified scientific team to aid drug development process at different stages of clinical trials through genomics/ pharmacogenomics approaches. ACTS has established collaborations with top International pharmaceutical and Biotechnology companies.

Dr. Jen Chen, Chairman of Qualitix Clinical Research Co., Ltd stated "This strategic partnership would enhance our clinical research services and enable us to offer high quality pharmacogenomics services in addition to our regular clinical trial services to our existing and potential future clients". Qualitix is embracing a business model of "Being a Total Solution CRO in Medical Development", and believes value added services are important elements for strengthening company capacity and competitiveness. Qualitix, over the past few years has established partnerships with CROs around the globe including Novotech (Australia), Asklep (Japan), Dream CIS (Korea), ASKA Research (North America), Harrison Clinical Research Group (Europe), and MakroCare (India).

Both the companies would aim to jointly market their services and explore new business opportunities with specific emphasis in oncology related therapies.

About Qualitix Clinical Research Co., Ltd.

With abundant experience and know-how, Qualitix (www.qualitix.com.tw) helps pharmaceutical, biotech and device manufacturers plan and manage trials from beginning to end. Qualitix strengths are study consulting and study design, medical writing and feasibility for patient recruitment along with subsequent clinical monitoring, data Management, and Biometrics.
